

FDL

FENNVILLE DISTRICT LIBRARY

under construction

Why is this happening?

SAFETY

- The parking lot currently poses safety risks for both pedestrians and drivers, especially in the drive near the main door.

ACCESSIBILITY

- The parking lot has only one accessible parking space for people with disabilities, which does not meet the needs of our community.

LONGEVITY

- The parking lot is 36 years old, and its age is becoming visible. This new parking lot should last for just as long, if not longer!

ENVIRONMENTAL

- During construction, a new storm drain will be installed to help control the runoff water and prevent flooding in the library. Additionally, a new retaining wall will help control current erosion and prevent it from becoming a problem again in the future.
